RE: Site Inspection, Desert Sandscapes, Black Ridge #1, S/053/027, Washington County, Utah

Date of Inspection: April 16, 1999
Time of Inspection: 0930
Conditions: Warm and Windy
Participants: Lynn Kunzler and Doug Jensen DOGM

Purpose of Inspection: Site visit and assessment

This site is accessed by existing roads and a short (100') site road into a wash. The site is presently being developed by a contractor to begin producing picturestone. The contractor operating for the owner presently has a trackhoe, small D-4 cat, loader and a track-drill at the site. The disturbance in the area was approximated to be very close to the five acre threshold. The contractor was made aware of this fact and he indicated that he would contact the owner for permission to reclaim an old waste dump located below the working area. This dump encompasses about two acres and reclaiming that area would keep the disturbance below five acres.

Another visit should be scheduled in the near future to monitor the progress of this reclamation. Photos were taken to document the inspection. GPS was used to establish UTM coordinates.
